

## BCFPI REFERENCES 2024

Numerous peer-reviewed journal articles and books have used BCFPI for measurement, planning or management related to children's mental health. A reference list follows (compiled up to January 2025), which includes web links to the articles.

Areas of study include but are not limited to:

BCFPI use for policy and planning issues for children's mental health

- wait times, dropouts, profiles and service utilization
- description of children's mental health services
- prevalence of children's mental health symptoms

BCFPI as a screening tool for children's mental health

- development, description, and validity of the tool
- scales for infants, toddlers, preschoolers as well as 6 to 18 year-olds
- measurement of symptom severity and impairment
- data collection - structured interview vs checklist

BCFPI as a research and outcome tool

- outcome of specific programs
- description of children's mental health symptoms
- examining differences between groups
