

BCFPI REFERENCES

Theses and Dissertations

The BCFPI has been used or referenced for research purposes in various studies of children's mental health. Following is a list of graduates that have utilized the BCFPI for their Master's thesis or Doctoral dissertation, including web links to the articles.

Areas of study include but are not limited to:

BCFPI as a research and outcome tool

- outcome of specific programs
- description of children's mental health symptoms
- examining differences between groups

BCFPI as a screening tool for children's mental health

- development, description, and validity of the tool
- scales for infants, toddlers, preschoolers as well as 6 to 18 year-olds
- measurement of symptom severity and impairment
- data collection - structured interview vs checklist

BCFPI use for policy and planning issues for children's mental health

- wait times, dropouts, profiles and service utilization
- description of children's mental health services
- prevalence of children's mental health symptoms
